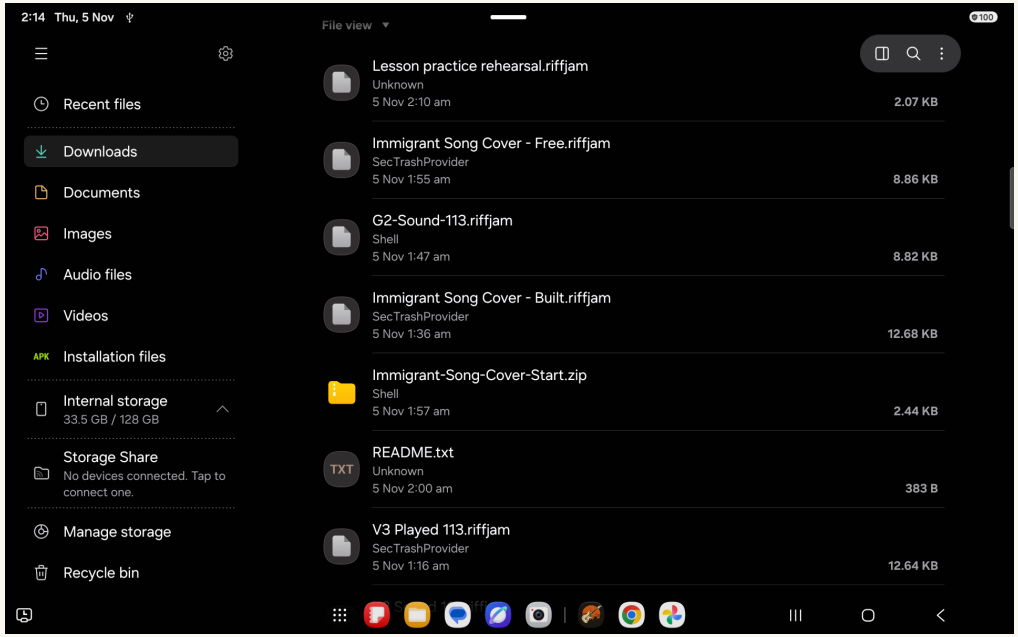
Download, open and save

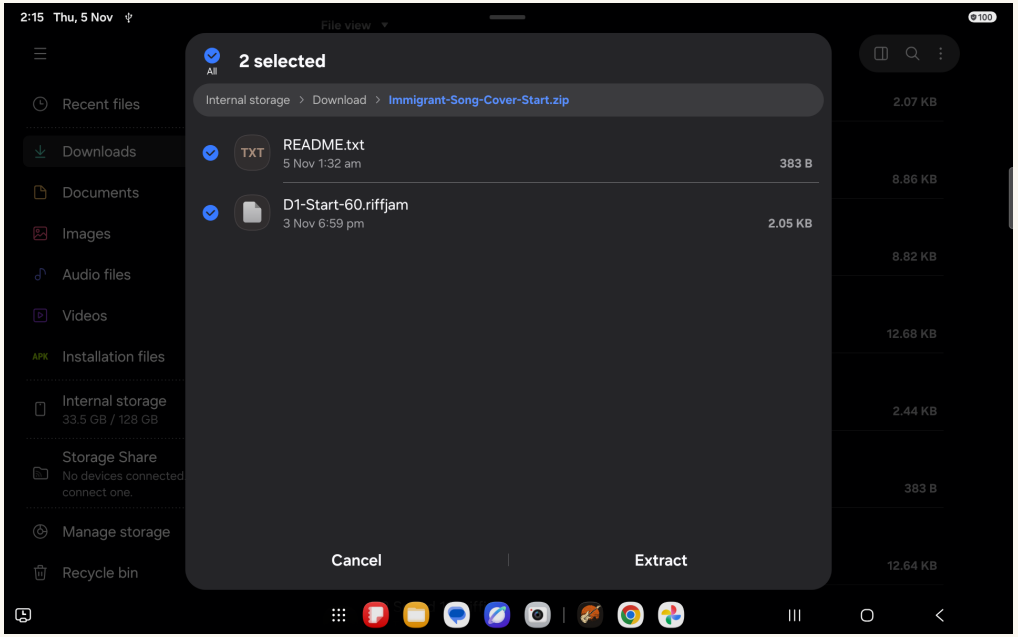
Extract the lesson ZIP, import the editable session, and save a practice copy.

Downloads / Start where you need



Each lesson has an editable starting session and a finished checkpoint. Download the lesson ZIP from its description. Here, the starter ZIP is already in Downloads in Samsung My Files. Other phones may call this app Files.

Open / The lesson ZIP

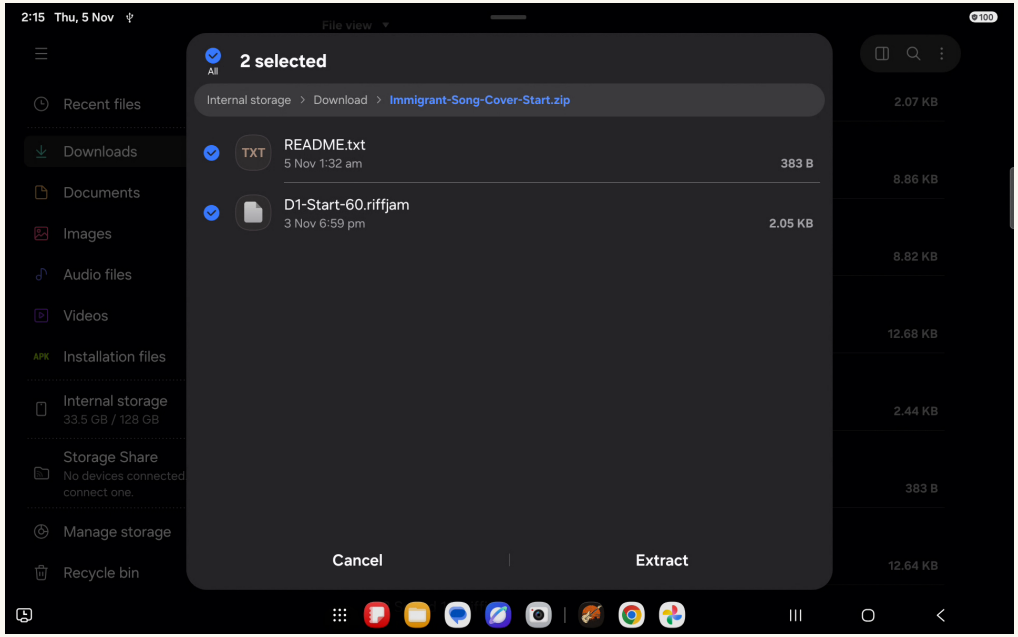


Tap Immigrant Song Cover Start dot zip. This outer ZIP is a folder of lesson materials. We will extract it first, then import the RiffJam session inside.

Download, open and save

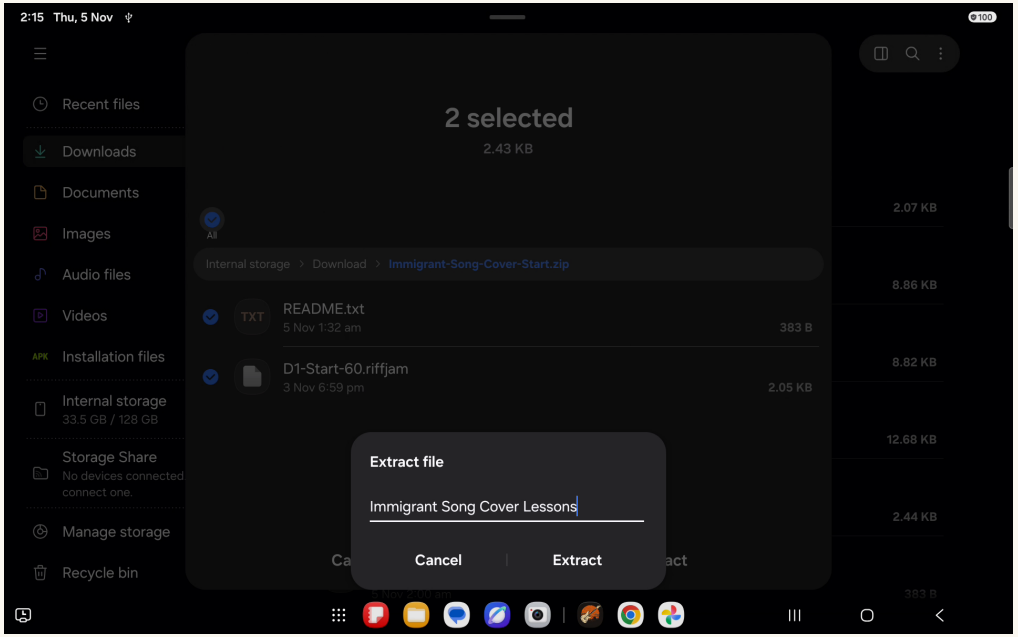
Extract the lesson ZIP, import the editable session, and save a practice copy.

Extract / Keep both files



Keep both files selected and tap Extract. The readme explains the download, and the RiffJam file is our editable session.

Folder / Immigrant Song Cover Lessons

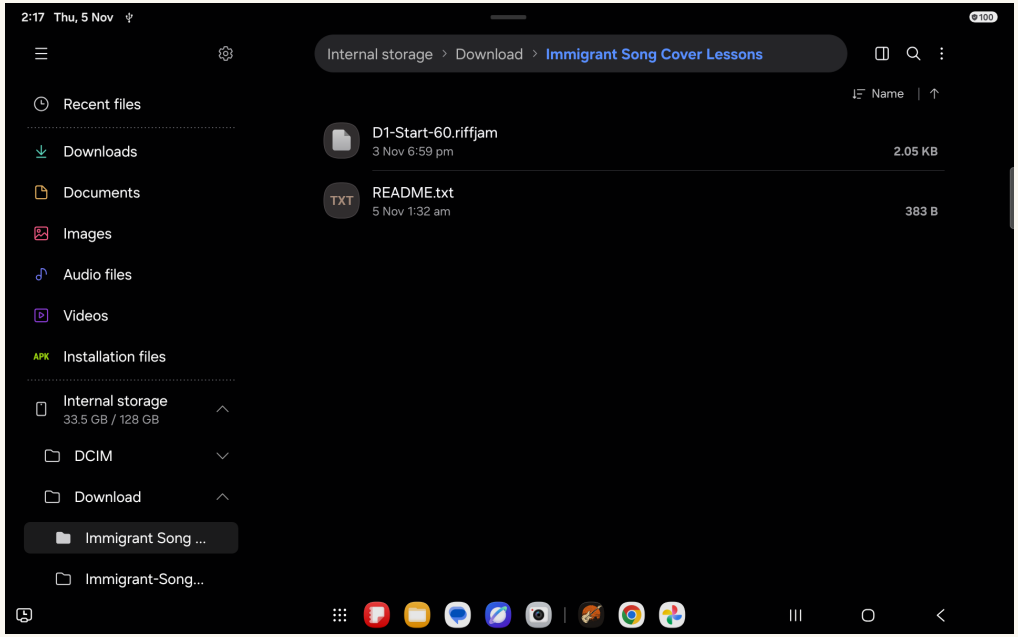


Choose a folder name you will recognise. I am calling mine Immigrant Song Cover Lessons. Tap Extract to create the folder.

Download, open and save

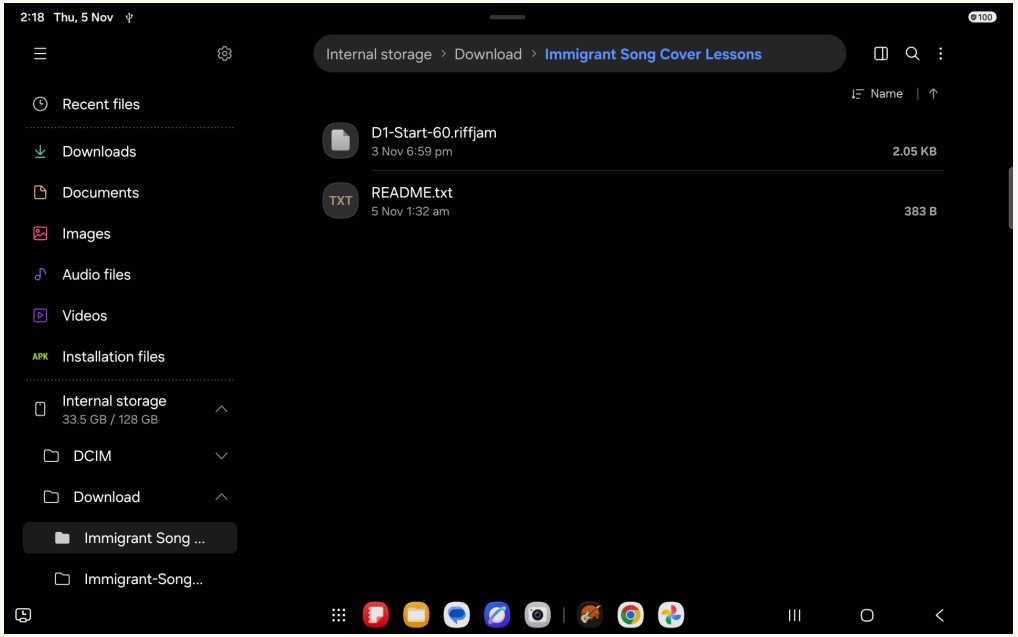
Extract the lesson ZIP, import the editable session, and save a practice copy.

Find / The extracted folder



Samsung My Files returns to its Downloads list after extraction. Choose Internal storage, then Download, and open Immigrant Song Cover Lessons. This is the folder we just created.

Files / Keep the session intact



The extracted folder contains D one Start sixty dot riffjam. Keep that file intact. It opens in RiffJam; there is no need to unpack it again. The starter is empty, ready for our first drum lesson.

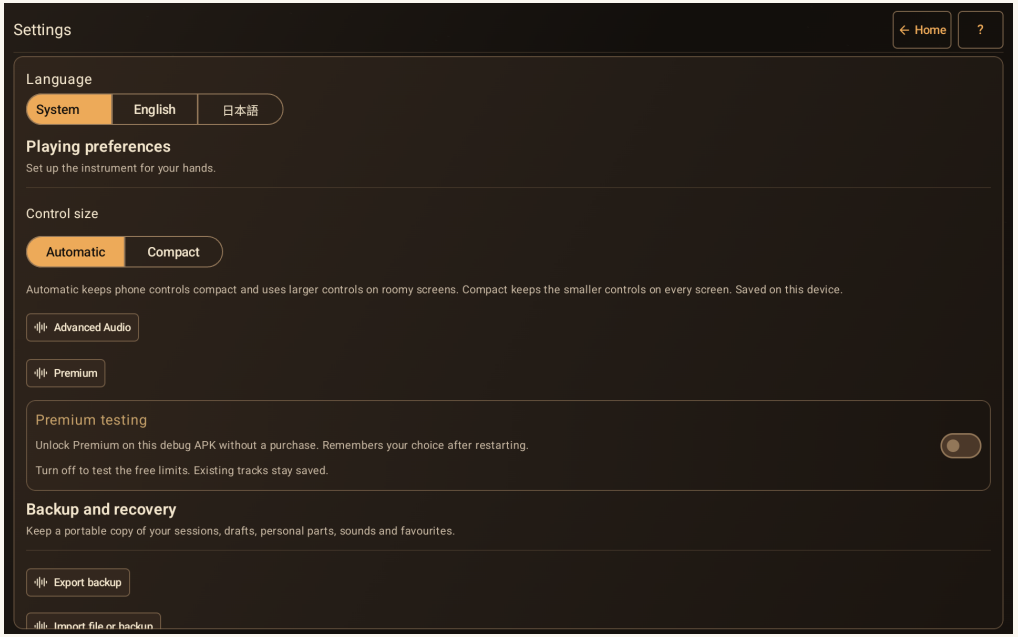
Download, open and save

Extract the lesson ZIP, import the editable session, and save a practice copy.

Return / Open RiffJam

Return to RiffJam. On this tablet I can tap its icon in the taskbar. On your phone, use your home screen or recent apps.

Home / Settings

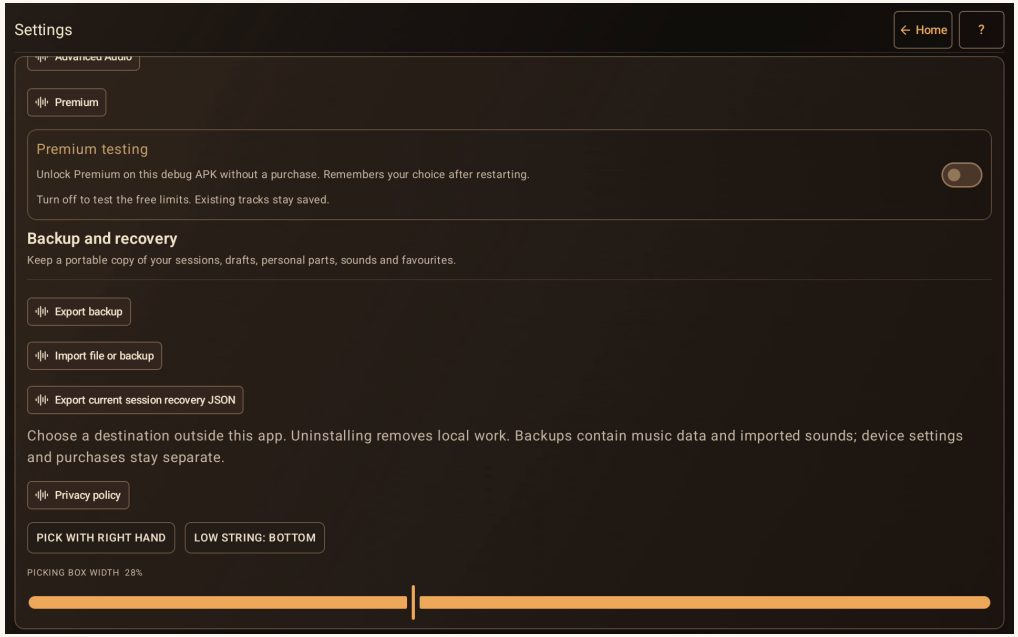


From RiffJam Home, choose Settings. If you are inside a session, use Exit Session first. Your existing work stays available.

Download, open and save

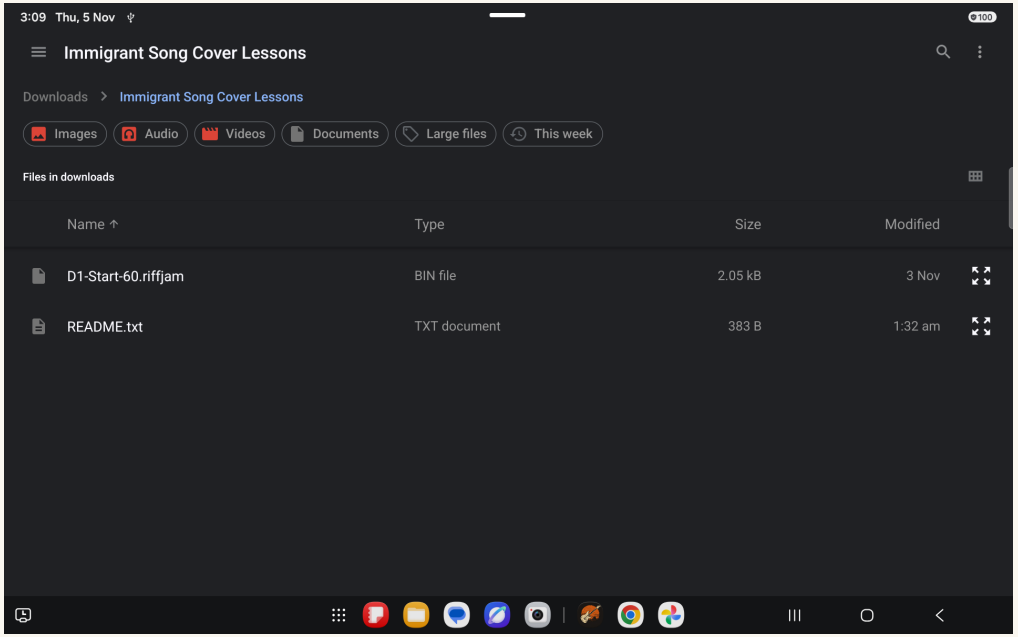
Extract the lesson ZIP, import the editable session, and save a practice copy.

Settings / Backup and recovery



Scroll down to Backup and recovery. Choose Import file or backup. This opens Android's file picker.

Picker / Downloads

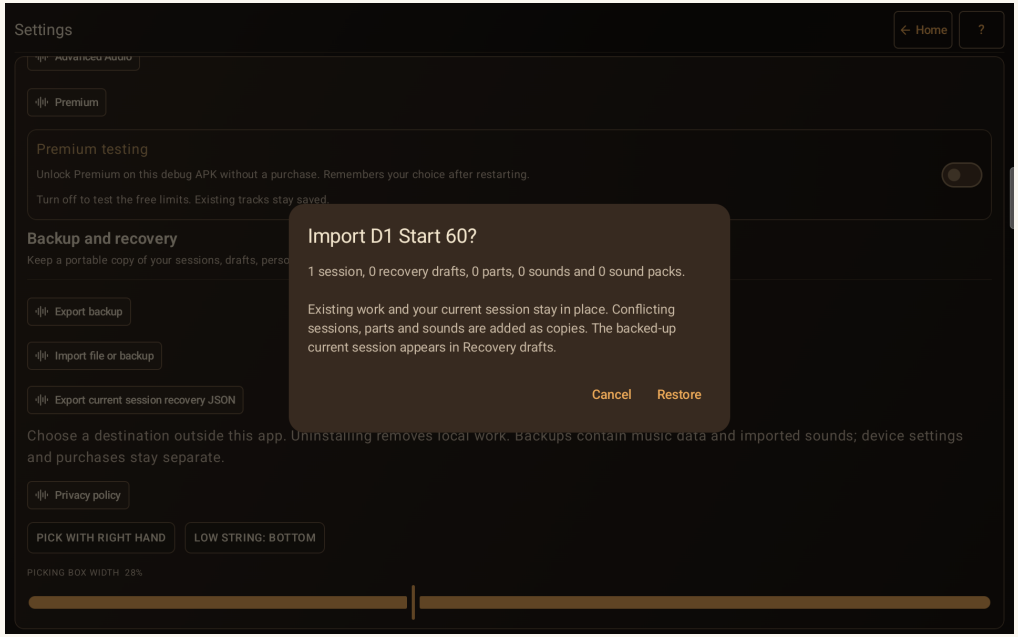


Find Downloads in the file picker. If a different folder is showing, use the location menu or the Downloads breadcrumb. Then open Immigrant Song Cover Lessons.

Download, open and save

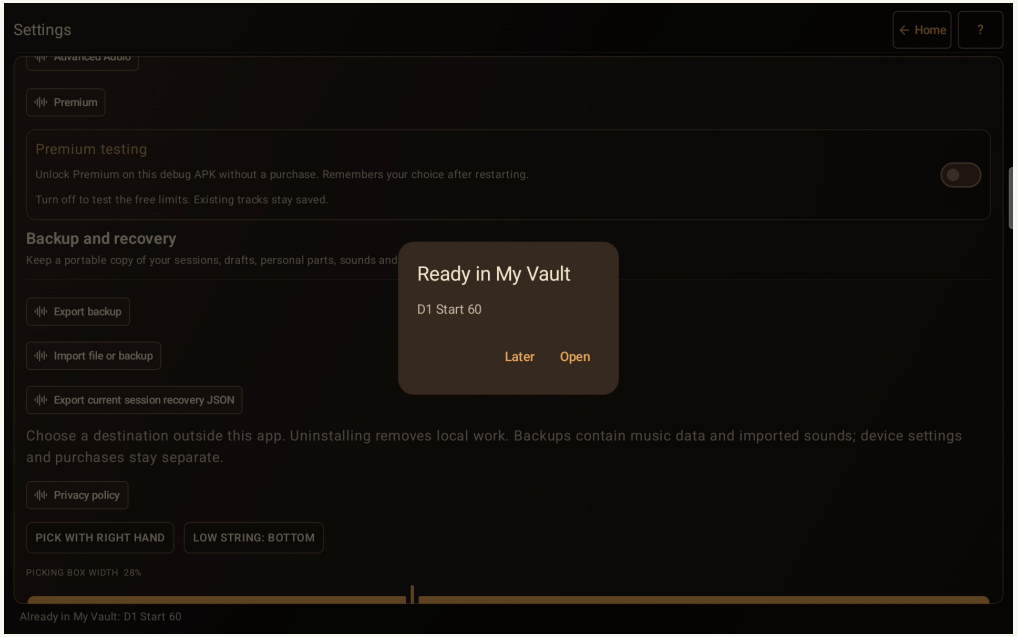
Extract the lesson ZIP, import the editable session, and save a practice copy.

Import / Select the RiffJam file



Tap D one Start sixty dot riffjam. Check the import summary. This file contains one session. Existing work stays in place, and conflicting sessions are added as copies.

Restore / Add the session

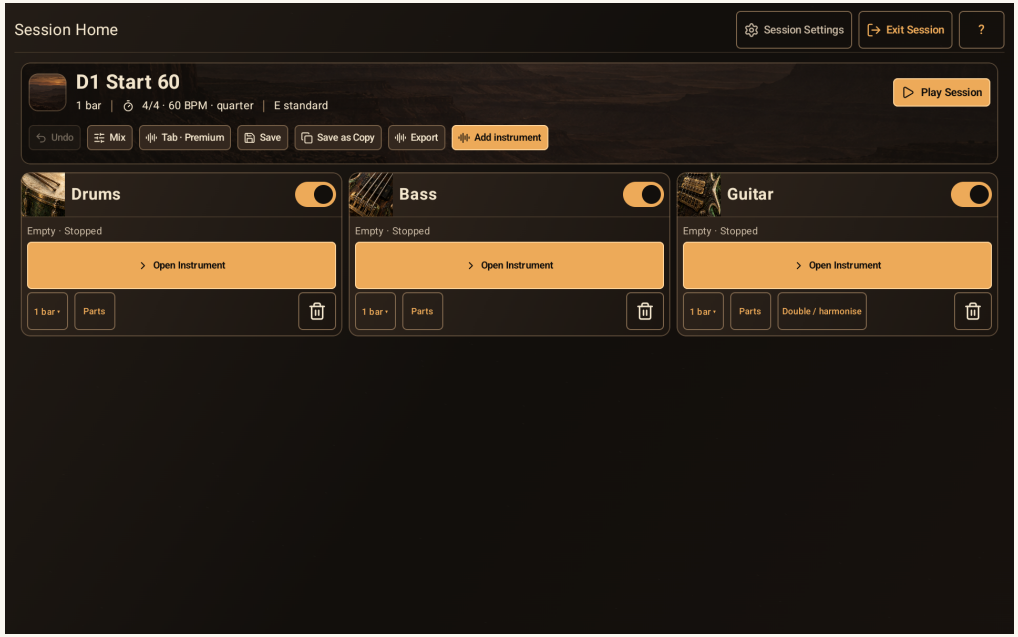


Tap Restore, then Open. Restore here means adding the contents of this file to your vault. It does not erase the session you were working on.

Download, open and save

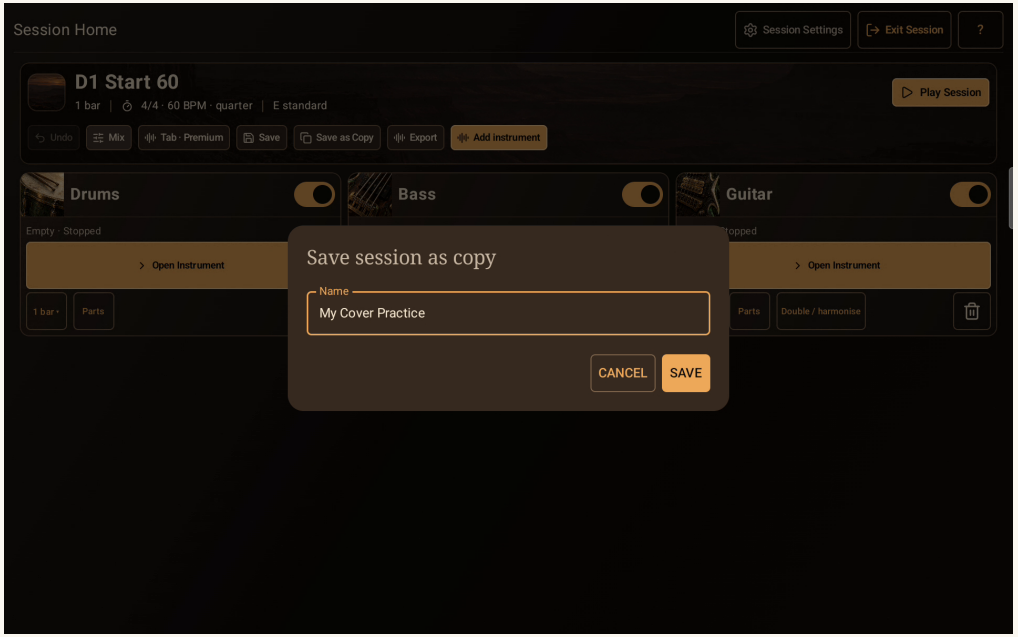
Extract the lesson ZIP, import the editable session, and save a practice copy.

Check / One empty bar at 60 BPM



Check the session before you begin: D one Start sixty, one bar, four-four time, and sixty beats per minute. The instrument tracks are empty. Later checkpoints already contain the earlier lesson's work.

Save as Copy / Protect the starting point

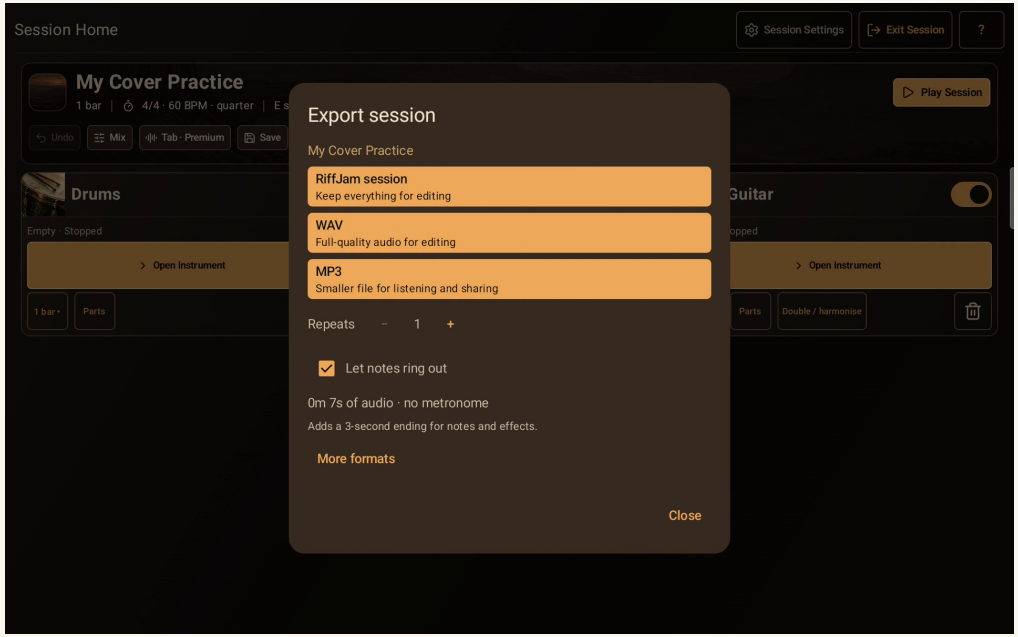


Choose Save as Copy. Give your practice session a clear name. I will use My Cover Practice. Save it, and the original starting point stays separate.

Download, open and save

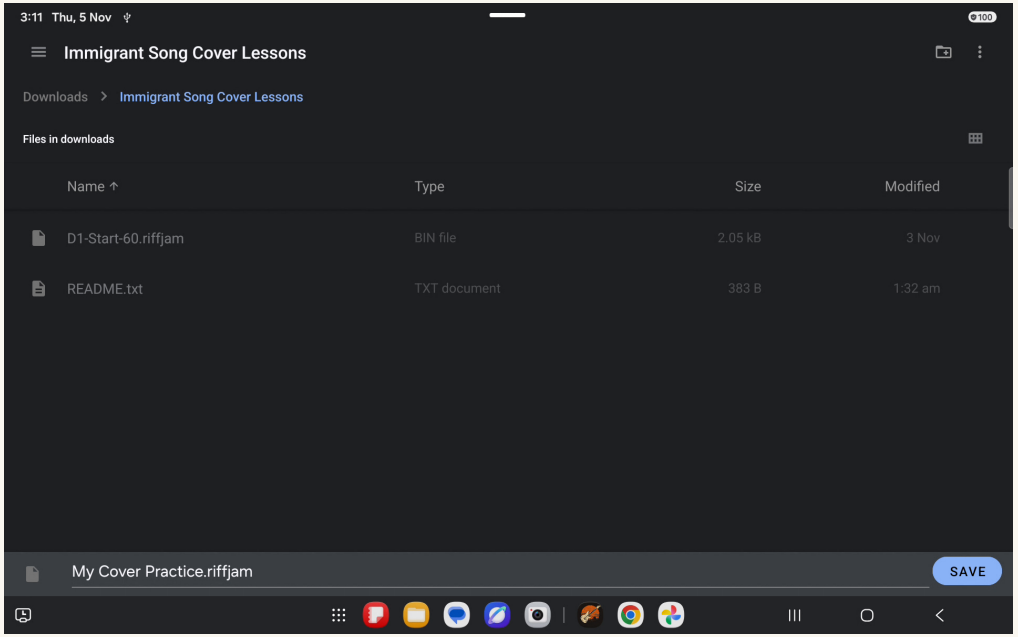
Extract the lesson ZIP, import the editable session, and save a practice copy.

Export / Editable RiffJam session



Choose Export, then RiffJam session. This is the editable format we need for later lessons. Audio exports are useful for listening, but they cannot replace an editable session.

Save / Keep the exported copy

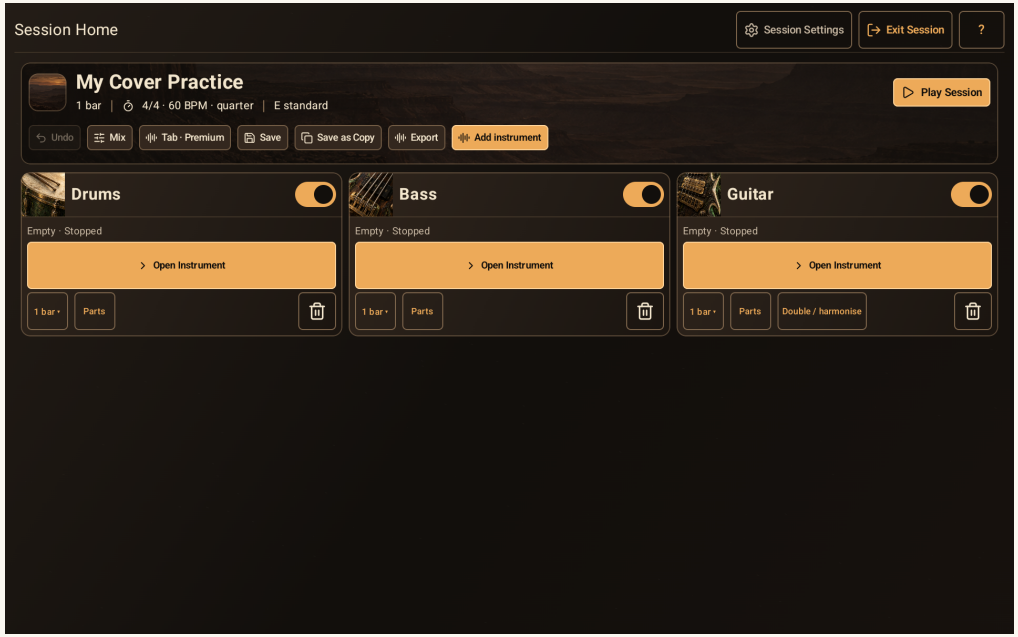


Choose a folder you can find again, check the filename, and tap Save. Here I am keeping the copy in our lesson folder. You can also copy it to your own backup storage.

Download, open and save

Extract the lesson ZIP, import the editable session, and save a practice copy.

Ready / Follow one lesson route



You are ready for the first drum lesson. For later episodes, repeat these steps with that episode's starting file, or continue with your own finished session. Choose either the played or editor route; you do not need to do both.
